

Preliminary Data

**NEW**

PRIMARY

SECONDARY

## Features

- Automatic operation, No balancing is required
- Measures and displays transformer Ratio, Excitation Current
- 20 X 4 backlit LCD display for Ratio and excitation current.
- True 4 terminal measurement.
- Fully protected against any wrong connections.
- Single Phase / Three phase model
- Phase selection through selector switch

## Application:

- Power Transformers
- Distribution Transformers
- Current Transformer
- Motor
- Live Switch Yard Measurements

## Technical Specification

**Power Supply** : 230V AC, 50Hz, single phase.**Test Voltage** : 100 and 10VAC user selectable**Test Leads** : 5 Meters each for LV and HV winding connection

| RATIO RANGE             | ACCURACY                       |
|-------------------------|--------------------------------|
| 0.8 - 2000 Auto Ranging | $\pm 0.5\%$ FSD $\pm 3$ Digits |
